

FOR IMMEDIATE RELEASE

Dmailer Introduces Online Backup with its Latest Release of Dmailer Backup, Version 2.6

Going beyond conventional backup

MARSEILLE, FRANCE, June 17, 2009. Dmailer, a leading software provider specializing in portable backup and synchronization solutions for mobile storage devices, introduces a new online backup service with the latest version of its backup software product, **Dmailer Backup 2.6**.

Ultra-simple, yet highly functional, **Dmailer Backup V2.6** with **Dmailer Online** offers two means for backing up user's data thus enhancing its "one-touch" restore capability. **Dmailer Backup V2.6** grants users the capability to back up files and folders from a Mac or PC – with the ability of using different profiles – to the same mobile storage device or online. It allows users to enjoy the same rich feature set and GUI on a PC or Mac, overcoming compatibility issues by allowing the same application and services to be used on *both* systems.

"**Dmailer Backup V2.6** integrates complementary functionality for backing up online from either a PC or a Mac with the capability of easily restoring across both platforms," says Lucas Léonardi, Dmailer's CEO. **Dmailer Online** can serve users with an efficient tool for sharing office documents or family pictures. "Our commitment to provide cross-platform backup solutions and our ability to answer the inherent problems around Mac/PC compatibility makes **Dmailer Backup V2.6** with **Dmailer Online** the perfect solution in mixed Mac/PC offices or households. Integrating online backup capabilities with our backup application enables us to provide users with additional data protection as well as peace of mind. It's clearly a cross-platform solution, Mac & PC, that goes beyond conventional backup" said Léonardi.

Dmailer is offering all **Dmailer Backup 2.6** users a full 3-Gigabyte, 30-day trial for free. Users may choose to subscribe to one of the three **Dmailer Online** plans; \$5.99 a year for 3GB of storage, \$34.99 a year for 30GB and \$69.99 a year for unlimited storage.

Starting June 15, 2009, **Dmailer Backup V2.6** is available for download in 18 languages at <http://www.dmailer.com>.
