

## **Dmailer Makes DmailerSync™ software Available for U3 Powered USB Smart Drives platform; Coupled with any U3 Powered USB Smart Drive, DmailerSync™ becomes the perfect “advanced synchronization and backup solution” for all your personal files and your entire Outlook® mailbox.**

Marseille, France - June 15, 2005 - Creator of a unique set of “advanced synchronization and backup solution”, Dmailer today announced that its DmailerSync™ software is now compatible with any U3 powered USB smart drives.

DmailerSync™ allows end users to easily and securely (AES 128-bit encryption) SYNCHRONIZE and BACKUP all their personal files and Outlook® data from multiple computers with any U3 powered USB smart drives:

- With DmailerSync™ software, end users can SYNCHRONIZE all their personal files (documents, images, music, video, archives, Internet Explorer™ favorites etc.) and their entire Outlook® mailbox (emails, attachments, folders, calendar, contacts, tasks, notes) from multiple Windows-based PC with a U3 powered USB smart drive. All data are 128-bit AES encrypted and password protected.

- Then, users can plug their U3 powered USB smart drive into another computer - even one that doesn't have Outlook® pre-installed - ACCESS and EDIT their personal data and Outlook® information without leaving permanent footprint on the borrowed computer! Thanks to DmailerSync™ embedded server capability, end users can even SEND and RECEIVE emails directly from their U3 Powered USB Smart Drive connected to any host computer in just a few clicks.

- Returning to home or office base, U3 powered USB smart drive owners can update their main system effortlessly with the new data and messages in one single click! DmailerSync™ synchronizes all of their changes like they have never been gone... Bi-directional synchronization has never been so powerful!

- On top of it, DmailerSync™ does a real BACKUP of all personal information (personal files and Outlook® mailbox) on the U3 powered USB smart drive so that in case of a PC crash, it will be able to easily restore them.

- Best of all, DmailerSync™ automatically reminds users of U3 powered USB smart drive to sync their data on a regular basis to keep those up-to-date.

DmailerSync™ software on a U3 powered USB smart drive is available in eight languages (English, French, Italian, Spanish, German, Japanese, Traditional and Simplified Chinese) and enables users to store, secure and synchronize their personal documents, Outlook® mailbox and Internet Explorer™ favorites and make them available on any PC running Windows 2000 or Windows XP.

“Thanks to its unique capabilities, DmailerSync™ software loaded on a U3 powered USB smart drive revolutionizes personal productivity by turning any computer into your own — in the office, at home or at school, in an internet cafe and beyond. DmailerSync™ software running on a U3 powered USB smart drive means you can now go on the road without having to carry a notebook, temporarily transform any PC into your own virtual PC, transport data between systems with your personal files and Outlook® mailbox always in your pocket.” said Lucas Léonardi, General Manager of Dmailer.

["U3 quote."](#)

[U3 powered USB smart drives transform the USB flash drive into a private, portable and protected workspace that simply plugs into any PC running Windows 2000 or Windows XP. Users access their personal applications and data from their USB smart drive through a user-friendly interface, called the U3 Launchpad, making computing more mobile and secure. The U3 smart drive computing platform is designed to leave the host computer unaltered when the U3 powered USB smart drive is](#)

removed, and to give the user full confidence that no personal information has been left behind.

DmailerSync™ software will be available for all U3 powered USB smart drives this summer.

#### About Dmailer

Headquartered in Marseille, France, Dmailer ([www.dmailer.com](http://www.dmailer.com)) is a privately held development and technology licensing company specialized in storage applications for devices and systems. For more information on the full line of Dmailer products please visit [www.dmailer.com](http://www.dmailer.com).

#### About U3

U3 LLC of Redwood City, Calif., has developed an innovative platform to make USB smart drives that host a "personal workspace" -- not only data and files, but software programs, personal user preferences and the means for managing them. U3 powered USB smart drives transform a PC into a truly personalized computer, quickly, easily and securely, and exit transparently when done. U3, backed by USB flash drive market leaders M-Systems (NASDAQ:FLSH) and SanDisk(R) Corporation (NASDAQ:SNDK), licenses its platform to USB drive manufacturers. For more information see [www.U3.com](http://www.U3.com).

U3 is a trademark of U3, LLC. All other brand and product names are or may be trademarks of, and are used to identify products or services of, their respective owners.
